Forrester Sire Sale

13th December 2024
Viewing 12pm, Auction 1pm

PEEL FOREST ESTATE

An estate of excellence

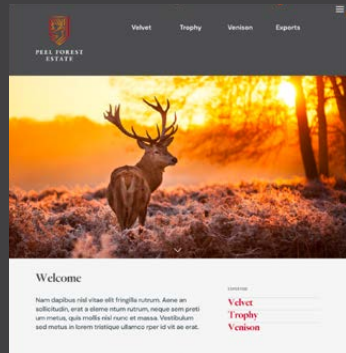

Our commitment to this industry has not wavered in the 35 years since Graham Carr originally set up Peel Forest Estate.

Most industries are cyclical in nature, and ours is no different. It needs a special kind of determination to keep the faith, and a firm commitment to ride out the difficult times to come out better in the good times.

Our determination and success is captured by a very simple philosophy, a quest for excellence in all we do. From innovation through genetics, to animal husbandry techniques, and responding to changing market demand and value-adding opportunities, we continue in our quest for excellence.

That's what our new brand is all about. We're proud of our new look because it sets us up for our future development, both here in New Zealand and export markets. Importantly it serves as a constant reminder that good enough isn't in our ongoing search for excellence – in everything we do.

Welcome to the 2024 Forrester Sire Sale

It's hard to believe another year has rolled around—time flies when you're busy! This past year has certainly been an interesting one for farmers. The change in Government has eased some of the more burdensome regulations (for now), allowing us to focus on what we do best: producing the finest products in the world.

While the velvet sector has faced a few challenges, I'm optimistic these are temporary and that a bright, prosperous future lies ahead for this cornerstone of our industry.

Venison prices this season have been encouraging, with the market showing upward momentum. As an industry, I believe we're well-positioned to sustain and even accelerate this growth. The USA presents significant opportunities, as does China, while our traditional European markets remain vital. Extending market demand to create year-round supply opportunities is an exciting challenge we must embrace.

On the home front, there are promising signs of recovery in national breeding hind numbers. I believe we've turned a corner, and this upward trend is essential for meeting growing demand. Producing the right types of cuts to match market expectations will be key to maintaining this positive trajectory.

This brings us to the Forrester Sires. These stags represent the culmination of years of dedicated breeding. I'm incredibly proud of the animals on offer and continually inspired by the glowing feedback we receive from clients. With a high percentage of repeat buyers, it's clear these Forresters are proving their worth in commercial operations, consistently delivering outstanding progeny.

This year's line-up includes a balanced mix of heavily weighted English stags and a few with a touch of European influence for those seeking a different

appeal. You'll also notice the hardy German influence which perform as an English stag will. We've invested considerable time and effort into selecting these stags, ensuring they meet the high standards we demand. Their performance in your operations is something we confidently stand behind.

You'll notice a strong representation from two standout sires, Husky and Bruiser. These exceptional English sires epitomize the traits we value most: correct phenotype, temperament, parasite resilience, growth, muscling, and velvet. Their progeny are big, gentle giants with outstanding qualities to match. Although there's no Magnum progeny in this sale, he'll make a strong return next season.

For those unable to attend the sale in person, we're pleased to offer real-time online bidding via BIDR. More details are available in the catalogue.

Finally, we warmly invite all potential buyers to view the stags prior to sale day. For private viewings, please don't hesitate to contact me, Mark, at 027 779 9008.

We look forward to welcoming you to this year's sale and thank you for your continued support of the Forrester program.

Ground breaking Johne's research at Peel Forest

The annual cost of Johne's disease to the New Zealand deer industry in 2011 was estimated at least \$8.8 million. Even more importantly, the cost of Johne's disease on farms with heavily affected deer herds can be huge, ruining the profitability of your deer unit.

For the last ten years Peel Forest Estate has made a serious commitment to breeding Johne's Resilient deer on the property and is leading the way with an industry breaking research project with Dr Frank Griffin, Head of Microbiology at the University of Otago.

There have been huge gains in the research by not only reducing the presence of Susceptible animals but more importantly identifying Resilient bloodlines. This breakthrough is even more important due to the fact Colin Mackintosh from Agresearch has identified the powerful heritability of either Susceptibility or Resilience to Johne's in deer. The heritability of the Johne's resilient trait ensures the ability of Peel Forest Estate stags to fight the disease on our client's properties.

In Colin Mackintosh's paper following his trial on heritability he comments "the offspring of the S (Susceptible) sire was significantly more severely affected than those of the R (Resilient) sire. Most of the Resistant, but not the Susceptible, showed evidence of resolving lesions and a reduction in M.A.P (Johne's) after challenge". The paper went on to say "the 5 male offspring gained significantly more weight than the 9 S offspring over the 49 week study (70.3kg versus 59.8kg) despite being

2.8kg lighter at the start". This difference was statistically significant and even more significant because the S sire had a higher breeding value for 12 month weight.

Further to this research Peel Forest Estate are now going to look into the possible improvements to meat yield and quality from progeny with Johne's resilience as well as the proven on farm productivity benefits.

All stock at Peel Forest Estate are continually challenged by Johne's which has resulted in a radical test-cull, natural and genetic selection for Johne's resilience. The heritability of the Johne's resilient trait ensures their ability to fight the disease on your property.

Sire stag care and management

Sires are the most valuable animal in the deer herd. They carry the genetics that will determine the future production of your herd. The welfare and 12 month health programme cannot be compromised if you wish to get the best from your sires.

On arrival

Stress is at a high level when your new stag arrives at your property. He has left familiar surroundings and mates he has lived with in a social group of around 40 animals of the same age. His arrival can be made a lot less stressful if you follow a few simple rules.

1. Your stag should arrive as early as possible to settle in (preferably before February)
2. Having a few animals in the yard when the stag is unloaded is important.

He should be introduced to a small group of similar age (10–15 animals). Never put with older stags or spikers. Ideally if the hinds he was to mate were nearby he could go directly into the mob. Early fawns should always be the aim.

The roar

A 3 year old stag will mate 40–50 hinds comfortably if he does not have to travel too far or has no competing stag nearby. When you put your stag out is your choice (the earlier the better) but be aware it can take 5–10 days to be accepted into the mob before he begins mating.

It is possible to mate far more hinds than this but you risk a greater spread over calving and marked loss in body weight and performance in a young stag.

When the stags are taken out of the hinds minimize fighting by preparing a safe paddock (with plenty of feed, shade and water) by taking the most dominant stag (older) first. Avoid a very hot day.

Do not put stags used for mating with ones that have not been as this can cause excessive fighting.

Animal health

Your stag will have been drenched and coppered before leaving Peel Forest Estate.

As soon as the sires have settled down after the roar it is good practice to give them a drench, copper and a mineral booster. Hemo 15 is one option. This should be done no later than the end of May. He is at his most vulnerable state and parasites need to be addressed as soon as possible after the roar.

Conditions for sale

Sale will be conducted in accordance with conditions of sale as set down by South Canterbury Stock and Station Agent's Association, copy of which is exhibited at sale venue, and other terms set out in this catalogue.

Deer will be offered as catalogued, subject only to final draft. Intending purchasers are required to register at the office prior to commencement of sale to obtain buyer's number and advise appropriate stock and station agent.

Each lot shall become the property and responsibility of the purchaser on the fall of the hammer.

Terms are strictly cash unless prior arrangements are made with one of the selling agents.

Sale will be conducted GST exclusive.

Purchaser must give complete delivery instructions to the office, using one of the delivery instruction sheets in the back of this catalogue and receive delivery docket before removing animals.

The vendor will offer a commission of 4% to non-participating companies. Notice should be given in writing to the vendor 24 hours before the commencement of sale.

Special conditions

No animals, embryos or semen sold by Peel Forest Estate or their germplasm, any subsequent progeny or germplasm, including the semen and germplasm of that progeny, may be supplied to any third party without the written permission of Peel Forest Estate.

This condition does not affect normal commercial deer farming or stud farming or their normal sales of semen or embryos as it only applies to entities with the primary function of commercial semen/germplasm activity.

It is a condition of sale of any animals, embryos, or germplasm or semen sold by Peel Forest Estate, that the purchaser agrees to include the following clause as a condition of any subsequent sale or gift of any animal, embryo, semen, germplasm or subsequent progeny or germplasm to a third party – "the purchaser acknowledges that it will not supply any animals, embryos, semen or germplasm to any commercial semen/germplasm marketing or sales entity, and will ensure that this clause is inserted as a condition of any sale or gift of any animals, embryos, semen or germplasm".

Sale

Animals will be penned by 11.30a.m. on the day of the sale. All stags will be velveted

which will remain the property of Peel Forest Estate.

Certificates

Certificate copies of TB accredited free status, Johnes Clear Test and pedigree will be provided to the purchaser and are available for inspection by all potential clients.

General insurance

Insurance facilities will be available at the office.

Herd health status

Peel Forest Estate has completed a re-accreditation TB whole herd test. We have a C10 plus status. All stags have received a veterinarian physical testicular examination.

Guarantee

Should a stag prove to be infertile from natural causes it will be replaced. In all events the Seller will not be held responsible for loss of production or consequential losses on any animal sold. Notification of any dissatisfaction must be made within 12 months of the date of sale. Subject to these terms, the vendor makes no warranty about any animal sold.

Disclaimer

While these details are prepared with the greatest of care Peel Forest Estate accept no responsibilities for omissions and missed descriptions.

Using DEERselect EBVs

What is DEERselect?

DEER Select is the genetic evaluation system for the deer industry. DEERSelect can assist you in your purchase by providing an indication of the relative progeny performance of each stag. DEERSelect is a simple system to use. Each animal has an individual "Breeding Value" (or BV) for certain traits which are related to economic profitability. By comparing BVs between animals, you can assess the relative merits of animals for different traits.

What do the different BVs mean?

BVs are available for growth and antler traits (the system will be expanded over time to consider other economically important traits). The traits reported are:

How do BVs relate to performance?

BVs are expressed in actual units of production (kg of liveweight or velvet), so are directly related to expected impacts on performance. An animal passes on half of its genes to its offspring (the other half come from the other parent). So if we take an example of 2 stags, one with a 12-month weight EBV of +12 kg and the other of +8 kg, and mate them to the same group of hinds, the first stag will pass on an impact of +6 kg to his offspring, while the second will pass on +4 kg. Thus we would expect the offspring of the +12 stag to be 2 kg heavier at 12 months of age than those of the +8 stag (i.e. half of the difference in breeding value).

12-Month Weight (W12BV)

- gives the animal's genetic merit for weight at twelve

months of age in kg. For example, a W12eBV of +10.0 means that the animal carries genes to make it 10 kg heavier than the base population at 12 months of age. For venison production, this is the trait deer farmers are paid on so should receive significant emphasis if purchasing genetics for venison.

New EBV Conception Date (CDeBV)

Negative value indicates earlier conception and calving date to the average and possibly higher conception rate especially in first calving hinds.

Mature weight (MWTBV)

- This compares the mature weight of hinds (i.e. 3+ years). Again, the values are expressed in kg live-weight. This trait is economically important for both venison and velvet production, as it is an indicator of how much feed is required to maintain an adult animal. Although it is expressed on a breeding hind basis, it is closely related to mature weight of adult stags as well.

This will maximise the profit per hectare of your velvet enterprise by producing more velvet per stag and running stags at higher stocking rates.

This means that if genetics are sought to breed replacement hinds, 12-month weight needs to be balanced with the mature weight to keep hind size (and hence feed costs) at an appropriate level. There may be considerations with handling ability too, depending on your individual preference. Mature weight is not economically important for terminal sires (concentrate on 12-month weight).

Mature Velvet Weight (MVWBV)

This compares the weight of velvet produced by a mature velvet stag - values are expressed as kg of velvet cut at optimal time.

The MVWBV is a significant driver of velvet profitability and should be considered along with likely impacts on velvet grade when comparing animals.

Eye Muscle Area (EMAcBV)

- (sq cm) is calculated from measurements from live animal ultrasound scans and from abattoir carcass data. This EBV estimates genetic differences in eye muscle area. More positive EBVs indicate better muscling on animals. Sires with relatively higher EMA EBVs are expected to produce better muscled and higher percentage yielding progeny at the same carcass weight than will sires with lower EMA EBVs

Weaning Weight (WWTBV) -

The WWTBV gives the animal's genetic merit for weight at weaning, in kg. For example, a BV-WWT of +3.0 means the animal carries genes to make it 3 kg heavier than the base population at weaning.

Carla (CARLARBV)

- CARLARBV is a research breeding value that indicates the individuals' immune response to ingesting infective parasites at around 10 months of age. We do not know exactly if, or how Carla provides protection against parasites in deer, but in lambs a higher Carla response is correlated with lower faecal egg counts (FEC), and lower FEC in turn produces less infective parasites on the pasture.

Husky

Birthdate	2016
BREED Type	Pure English
W12BV	11.98
WWTBV	5.52
MWTBV	11.19
EMAceBV	-0.08
CARLArBV	162.95
CDeBV	-2.33
MVWBV	1.14
Yearling Weight	140.5 kg
Comment	9.41 kg SA2 at 3yrs

Husky is a stunning Pure English stag that is pivotal to both our Forrester line as well as our Velvet line. Retained as a 3yr old, he has all the traits we look for in a master sire at Peel Forest. He is as quiet as a lamb, exceptional conformation, high Carla for parasite resilience

and cut an impressive 9.41kg at 3yrs. He is truly a pleasure to handle through the yards and is leaving outstanding progeny in his wake. The future of Peel Forest is bright with Husky's influence filtering through.

Rangi

Birthdate	2016
BREED Type	6/8 English
W12BV	15.53
WWTBV	7.86
MWTBV	11.12
EMAcEBV	-0.87
CARLArBV	-2.45
CDeBV	-4.32
MVWBV	4.32
Yearling Weight	121.5 kg
Comment	10.17 kg SA2 at 3yrs

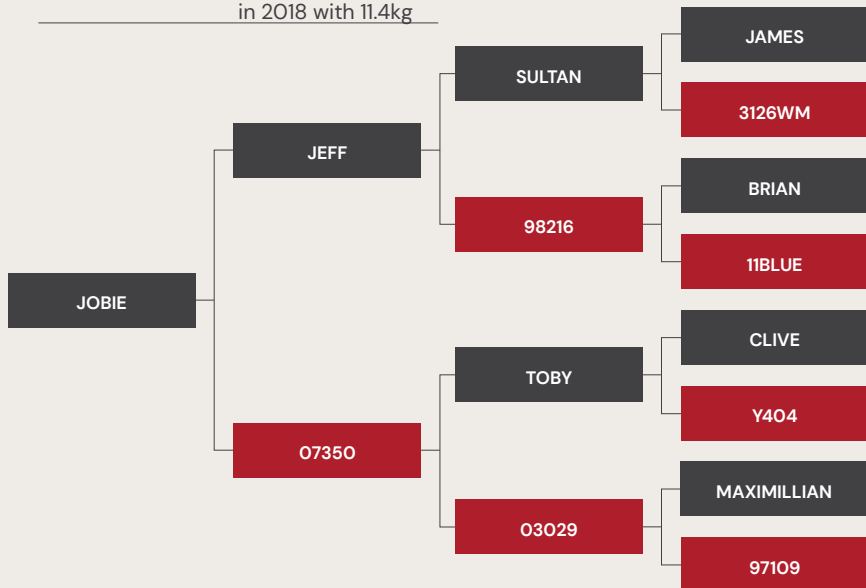

Rangi was retained as a 3yr old to remain in the stud after cutting an impressive 10.17 kg of stunning velvet. He came 2nd place in the National Velvet competition in 2019 in the 3yr old section. With his high growth rates, lovely temperament and correct phenotype he is now

a pivotal sire for both the Forrester and Velvet lines.

Jobie

Birthdate	2012
BREED Type	6/8 English, 1/8 German, 1/8 Euro
W12BV	16.97
WWTBV	7.28
MWTBV	15.26
EMAcBV	0.17
CARLArBV	-66.59
CDeBV	-2.69
MVWBV	3.17
Yearling Weight	116.5 kg
Comment	Best Velvet: 12.78kg SA2 in 2019. Came 4th in the Nationals in 2018 with 11.4kg

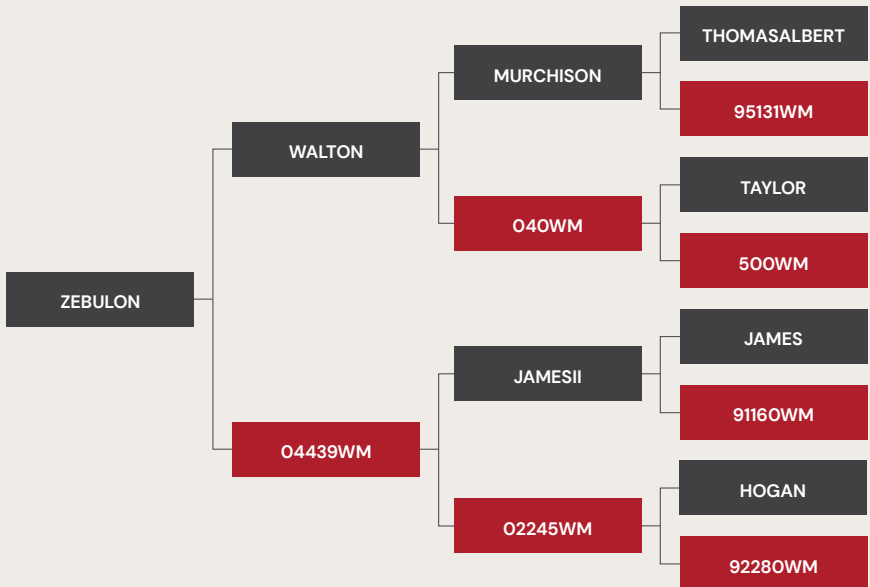

We decided to keep Jobie as a 3yr old and he has turned out to be one of our best Forrester sires. He has a magnificent structure, temperament and extremely nice velvet. Everything we look for in a master sire. He also came 4th in the 2018 National Velvet

competition with an immaculate velvet head. His progeny always seems to weigh up in the tops of the yearling lines. With 175 progeny on the ground we look forward to many more nice Jobie sons and daughters in the future.

Zebulon

Birthdate	2012
BREED Type	Pure Warnham
W12BV	11.16
WWTBV	5.16
MWTBV	10.77
EMAcEBV	0.97
CARLArBV	66.33
CDeBV	-1.68
MVWBV	2.5
Yearling Weight	115.5 kg
Comment	10.89 kg SA2 in 2019

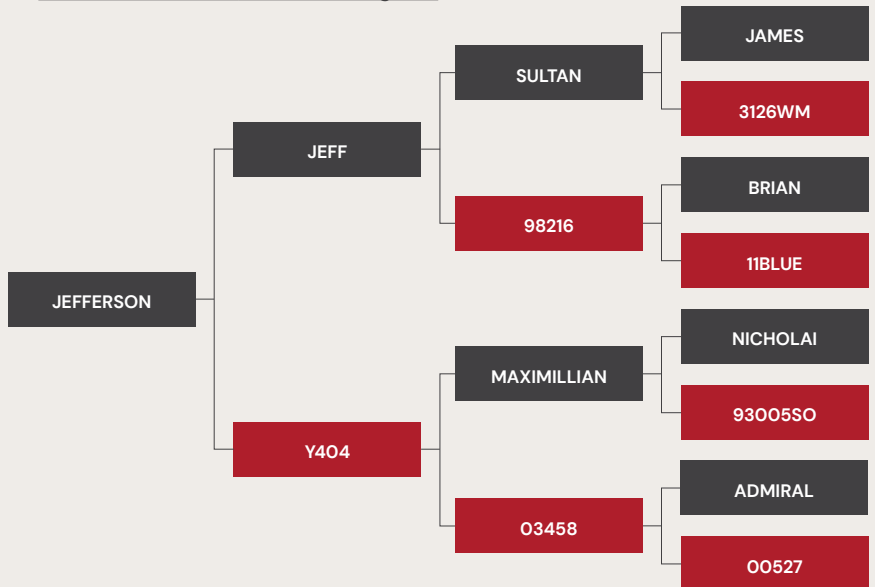

'Zeb' is a pure Warnham stag that was bred here at Peel Forest. His bloodlines are a new line coming through in our Forrester herd which we feel is very important to keep this line of deer striving forward. Zeb has fantastic figures for growth, eye muscle, Carla and velvet. The style of his velvet is exactly like his fathers, which is

very clean, competition type velvet. Regarding temperament he is as quiet as a lamb and this is certainly coming through in his progeny. Zebulon is a blocky English stag with fantastic conformation. He is the perfect example of what we believe a Forrester should look like with the figures/traits to back it up.

Jefferson

Birthdate	2010
BREED Type	6/8 English, 2/8 Euro
W12BV	17.68
WWTBV	12.53
MWTBV	17.71
EMAceBV	0.44
CARLArBV	-31.16
CDeBV	-7.03
MVWBV	1.69
Yearling Weight	153.5 kg
Comment	Extremely low Conception date being 7 days earlier than the average

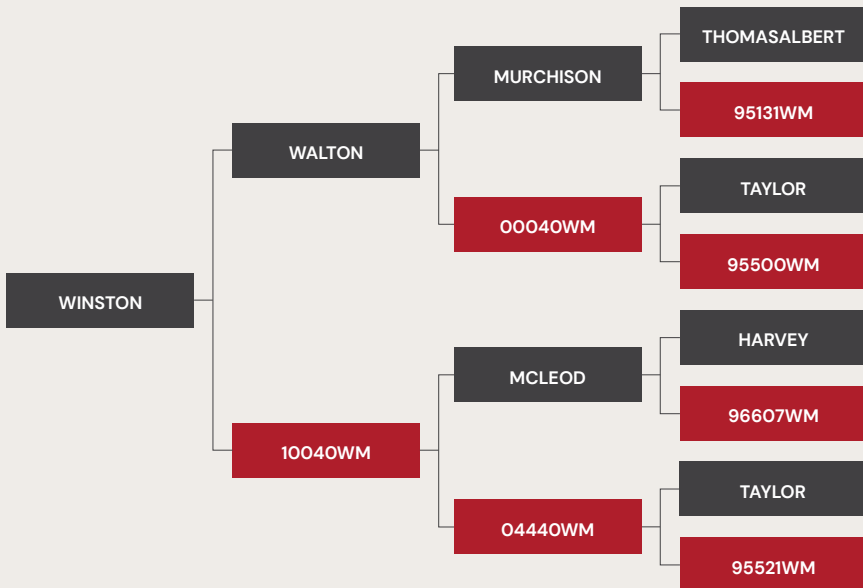

Jefferson, one of Jeff's outstanding progeny that we decided to keep, is producing some seriously nice looking stags. They are very blocky, muscular animals and are cutting good velvet. He has over 323 progeny on the ground now and we are never disappointed with what

comes through the shed. If you are looking for serious growth rates and nice temperament to go with it Jefferson is your man.

Winston

Birthdate	2013
BREED Type	Pure English
W12BV	8.6
WWTBV	3.27
MWTBV	5.47
EMAcBV	1.09
CARLArBV	207.53
CDeBV	-0.12
MVWBV	3.09
Yearling Weight	124.5 Kg
Comment	12.22 kg SA2at 7yrs

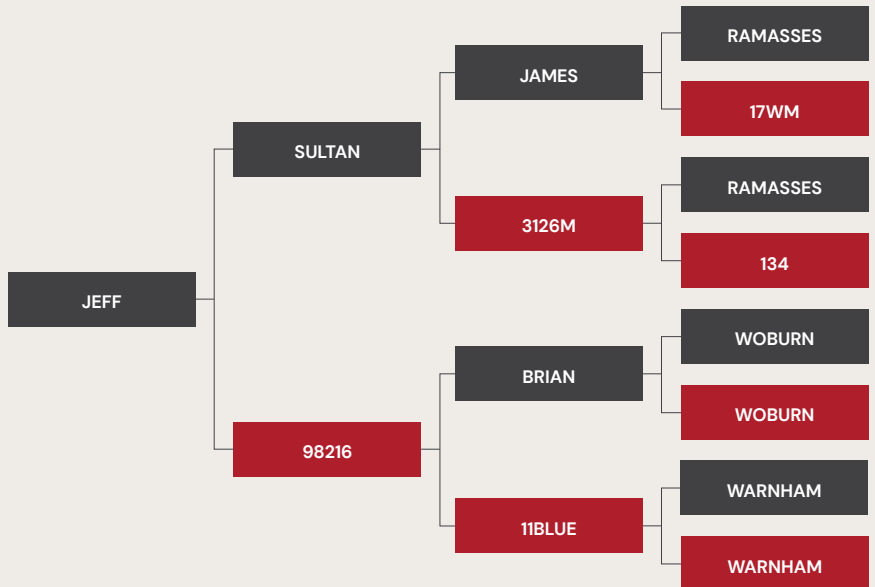

Winston is a truly magnificent English stag. With a full Windermere pedigree he has very powerful genetics for velvet cutting a stunning 12.2 kg of super clean, correct style velvet. Winston is a very powerful looking stag and he is leaving us some very impressive progeny.

Winston's progeny are cracking the 150kg mark as yearlings with high yielding muscular frames. He is a real star for Peel Forest and looking forward to many more progeny in the years to come.

Jeff

Birthdate	2002
BREED Type	Pure English - Warnham/Woburn
W12BV	13.2
WWTBV	1.17
MWTBV	13.7
EMAceBV	7.1
CARLArBV	0.06
CDeBV	N/A
MVWBV	-0.46
Yearling Weight	141 Kg
Comment	9.3kg SA2 at 7 yrs

JEFF is a very nice bodied Sultan son with an extremely quiet temperament. Cut a very nice head of 3.72 A2S at two years. He weighed a magnificent 141kg at 12 months He is a very fine sire with top growth genetics and antlers. His

EBV for 12 months growth is exceptional and continues to rise showing his amazing potency.

Magnum

Birthdate	2014
BREED Type	Pure Warnham
W12BV	17.4
WWTBV	9.99
MWTBV	13.34
EMAceBV	0.24
CARLArBV	54.31
CDeBV	-1.58
MVWBV	3.07
Yearling Weight	NA
Comment	Cut 16.86Kg of Velvet in 2020

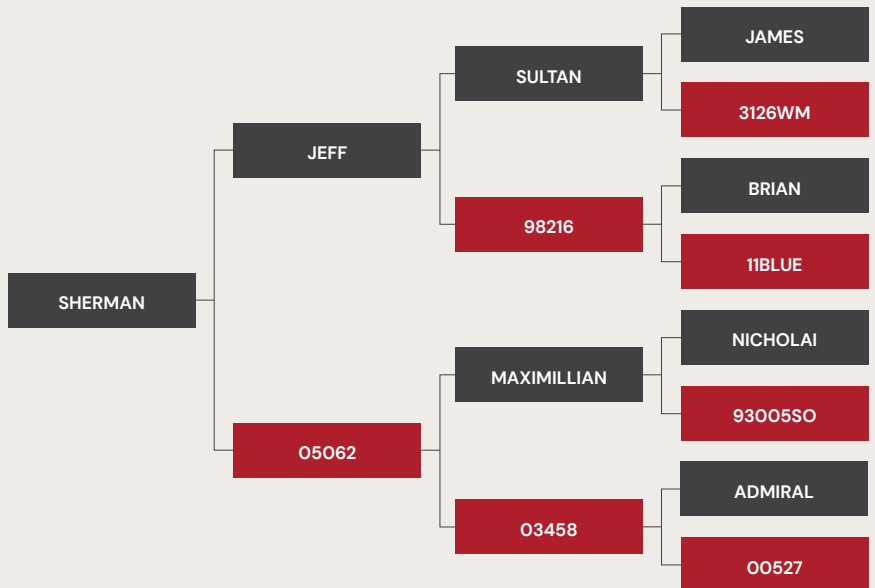

Purchased from Pampas Heights in 2018, Magnum gives us a new outcross for the Forrester and Velvet line. He is a massive Warnham stag who was used heavily in his first years mating with us. After progeny testing him through DeerSelect we were wrapped to discover he has top growth rates and Carla.

Not only that, he has fantastic velvet, winning the Reserve Champion at the Nationals in 2019 cutting an impressive 13.33kg at 5yrs. Magnum has everything has we look for in a Forrester/ Velvet Sire, with super quiet progeny.

Sherman

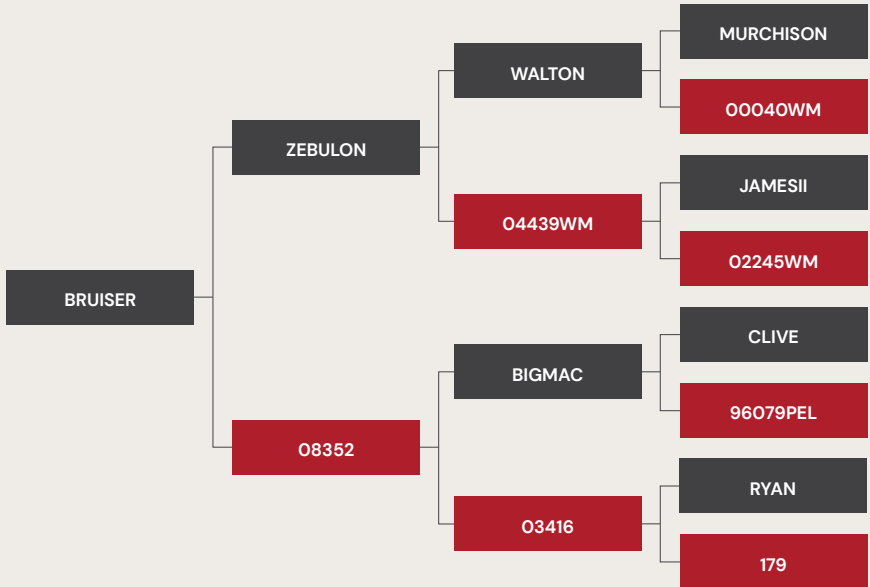

Birthdate	2011
BREED Type	6/8 English, 2/8 Euro
W12BV	14.5
WWTBV	5.4
MWTBV	15.5
EMAcBV	0.03
CARLArBV	-14
CDeBV	-5.7
MVWBV	1.8
Yearling Weight	144.5 Kg
Comment	11.93 kg in 2019

Sherman is a massive stag and a sight to behold. The muscle mass on this stag is exceptional. Temperament is very important for us and Sherman just cruises through the yards everytime we have him in. Also cuts a very impressive velvet (11.4kg). Top Sire..

Bruiser

Birthdate	2017
BREED Type	Pure English (Warnham/Furzi)
W12BV	14.22
WWTBV	6.49
MWTBV	9.83
EMAceBV	-0.34
CARLArBV	140.9
CDeBV	-2.99
MVWBV	2.21
Yearling Weight	134.5 kg
Comment	9.25 kg of velvet at 3yrs

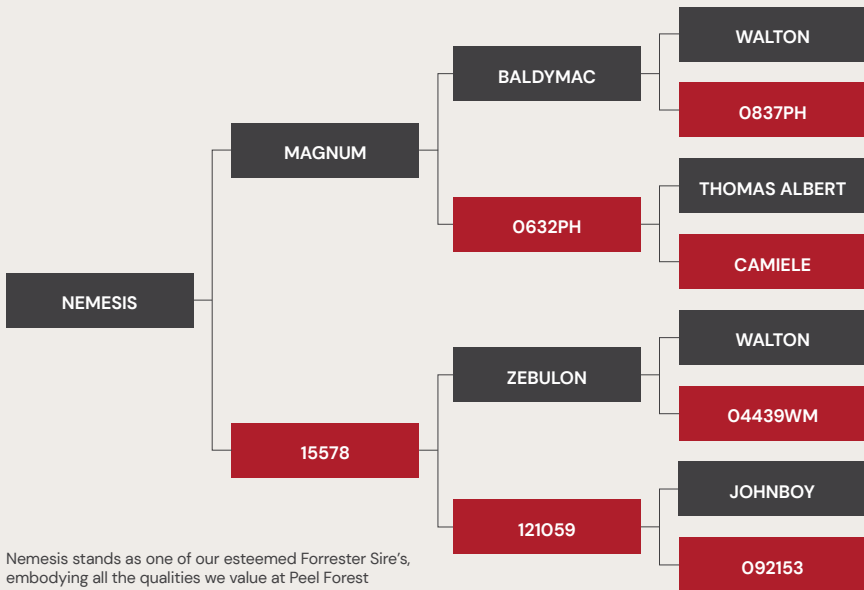

Bruiser was retained as a 3-year-old for his exceptional phenotype, standing out from the crowd with an impressive 9.25 kg of velvet. His calm temperament and ease of handling in the yards further highlight his appeal. With pure English bloodlines complemented by a

touch of diversity, Bruiser brings both strength and genetic depth to the Forrester program. We are excited to see the lasting impact of his impressive traits on our herd's future.

Nemesis

Birthdate	2018
BREED Type	94% English, 4% German
W12BV	20.9
WWTBV	11.74
MWTBV	14.32
EMAcBV	0.96
CARLArBV	8.82
CDeBV	0.03
MVWBV	3.07
Yearling Weight	153 kg
Comment	Cut 8.28 kg of velvet at 3yrs

Nemesis stands as one of our esteemed Forrester Sire's, embodying all the qualities we value at Peel Forest Estate in our venison genetics program. His exceptional phenotype boasts a robust frame with remarkable depth, impressive muscularity, and a wide body. Genetically, he is predominantly English (96%), with a touch of German heritage (4%) that closely aligns with the English type.

In addition to his striking physical attributes, Nemesis excels in the essential traits we prioritize in our program: growth, temperament and velvet production. At three years old, he cut 8.28kg SA2 of velvet, and has an exceptionally docile nature. This exceptional combination secured his place among our select Sire mob.

When it comes to data-driven performance, Nemesis exhibits one of the highest growth rates in New Zealand for an English stag, with a 12-month EBV of +20.9 kg.

For breeders seeking animals with outstanding attributes such as high yield, gentle temperament, rapid growth, and substantial velvet production, incorporating this extraordinary stag into your breeding program is an absolute necessity.

Franklin

This Pure English stag was initially retained as a Sire for the Forrester program after he cut an impressive 10.04 kg of velvet at 3yrs. He was then later sold to the North Island. He is as quiet as a lamb and exhibits all the traits we seek in this line. A true all rounder.

Lucas

Sold at the 2020 Forrester sale to Raroa Deer Stud, this was one stag we should have kept for ourselves. Weighing in at 151kg yearling weight, W12 of 15.34 and cutting 7.65 kg of velvet at 3yrs this stag has it all. A beautifully put together stag with parasite resilience and early conception data.

Very nice stag. 'Tank, massive and quiet' for shed comments. Top 25% for most traits. Fantastic stag to start the auction. He is one of four embryo brothers all in this sale. They are peas in a pod. LUCAS is a top stag we sold to Rarora Stud a few years back. NB: Small lump on jaw is old injury and is hard bone. This won't affect him whatsoever.

Wow! What a weapon of an animal. Boasting huge stats across the board and an exceptional phenotype, this stag truly has it all—including stunning velvet. He’s my pick of the sale, and it’s easy to see why. Growth, structure, parasite resilience, competition-quality velvet, temperament, and early conception—he ticks every box. One of four remarkable brothers in this lineup, all from an ET program.

A full brother to Lot 11, offering a fresh outcross of genetics. We've retained one of his brothers as a future sire in the Forrester program. If you're seeking a stag with a quiet temperament, exceptionally high parasite resilience, and pure English bloodlines, this is the one for you.

A nice, quiet, stocky, and well-built stag. His velvet wasn't cut at the time of writing but looks impressively heavy. I'm a big fan of the JOBIE progeny, and crossing Husky over this line has proven to be an excellent combination. He also boasts very respectable 12-month growth rates.

Directions

Directions to Peel Forest Estate from Christchurch:

Follow State Highway 1 through Ashburton south to Hinds. In the middle of Hinds turn right at the sign to Peel Forest, then 2nd left at sign to Peel Forest travelling along Hinds Arundel Rd approx. 15km.

At the "T" junction turn left onto Highway 72, go over to Rangitata River and then immediately turn right to Arundel. Up the hill and turn right to Peel Forest.

Directions to Peel Forest Estate from Dunedin:

Travelling north from Dunedin, follow State Highway 1 through Timaru to Winchester, north of Temuka.

Turn left to Geraldine following Highway 72, through Geraldine, veering left after the one lane Orari Bridge, following sign to Peel Forest. Turn left into Peel Forest Rd after Coopers Creek Bridge and travel approx. 12 km.

After the Peel Forest Village roadside sign turn left onto Dennistoun Road, a single lane gravel road with a double row of beech planted on each side. GO straight through the white wooden gates which will be open and continue over to cattlestop into a woodland, up through the trees over the 2nd cattlestop and then fork to your right to the sales complex. Please park in the designated car park.

We look forward to seeing you!

SATISFACTION GUARANTEED

Today more than ever, **service matters.**

For years, farmers have trusted and relied on Woodley's, with good reason.

Offering cost effective nationwide livestock transport – both down the road, or inter-island.

Our dedicated team of drivers deliver a professional customer focused service to farmers transport needs, daily. At Woodley's, we pride ourselves on our no nonsense, get on and do it attitude.

Call us. You won't regret it. You'll only wonder why you didn't earlier.

There's a reason why the best in the world trusts Gallagher.

Peel Forest Estate's two-year-old stag Olympus is a world record holder with his impressive 685-inch stag, a full 50 inches larger than the previous record holder. For an industry leader like Peel Forest Estate, where accurate data capture and comprehensive genetics analysis are paramount, there's no other gear for the job but Gallagher.

Peel Forest Estate uses Gallagher TSi2 Livestock Manager and HR5 Hand Held EID Tag Reader.
